Dear Editors,

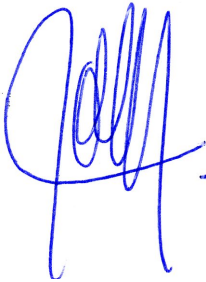

We would like you to consider our manuscript, *Assessing sub-cellular resolution in spatial proteomics experiments* for publication in the Omics section of Current Opinion in Chemical Biology. The manuscript is currently available on the bioRxiv preprint server¹.

In our manuscript, we describe a meta-analysis of 29 spatial proteomics experiments, quantitatively comparing and contrasting the their sub-cellular resolution using a newly developed software tool termed *QSep*. Our analyses and all the figures in our manuscript are fully reproducible using the code available in a dedicated Github repository².

Thanking you very much in advance for considering our manuscript for submission.

On behalf of the authors,

Yours sincerely,

Laurent Gatto
